Subject: revised MERS-like paper

Dear Kenneth, Trevor and Scott,

Many thanks for your recent contributions to our study. Having hopefully satisfied the reviewer's comments (with your help) I am now planning to resubmit the paper to mBio. We would like to include you as authors on the revised study, so have included the manuscript here for your records. While I am trying to avoid further edits, please do let me know if there are any significant errors that need to be corrected.

FYI - I am currently in west Africa with rather poor internet - so I am unable to include Figure 1 in this email (it is simply too large to email). It is a map of the sampling site, so not critical for your review of the study. I will forward this to you once I return. I am planning to resubmit the paper on Tuesday evening, so please let me know if you have any comments by that time.

Once again - thank you!!!!!!

Cheers
Simon
